

Planalytics Press Release

USM Maintains High Service Levels With Planalytics Business Weather Intelligence

WAYNE, PA, May 26, 2009 – Planalytics Inc. announced today that USM, a leading facilities management and maintenance company, has subscribed to Planalytics' Weather InsightsSM Service.

Through Weather InsightsSM, Planalytics will provide USM with forecasts, updates, alerts and round-the-clock access to the most comprehensive, continuously updated and normalized weather database available. USM will also utilize Planalytics' DirectAccessSM, which allows companies to identify historical weather conditions that have impacted business performance, down to the zip code level.

USM is a leading provider of facilities management and maintenance solutions to organizations with geographically dispersed facilities. Clients from a cross section of industries including retailers, banks, transportation providers and restaurants rely on USM to deliver mission-critical services including snow and ice management, landscaping, HVAC and disaster recovery. Because USM understands the significance of weather on service outcomes, they are now equipped with Business Weather Intelligence[®], enabling them to better advise their clients and vendors when making strategic budget and operational decisions.

"It's a fact that weather – particularly snow – has a material impact on our customers' top and bottom line," commented Jim Owens, Vice President of USM. "Planalytics provides us with the long range visibility and analytical tools to mitigate our customers' financial and operational exposure to the risks associated with severe weather events."

About USM
